1.

NOTE: The area where the tape will adhere to the bezel has to be cleaned with the alcohol wipe first. Do not install outside if the temperature is below 60°F. If the temperature is below 60°F, remove complete handle and install in a warm area so the adhesive can properly cure.

Read all instructions before proceeding with installation.

2.

Lift the handle all the way up and insert the lock assembly into the pocket under it. Tilt it up so that the two hooks slide into the cut-outs for the handle arms. The top edge of the lock assembly should clear the bottom edge of the handle. Push it in evenly and forcefully until the hooks snap into place.

NOTE: if the handle doesn't clear, remove the tailgate access panel and release the rods to get additional lift.

3.

After the hooks snap into place, lift the lock up slightly and peel off the backing from the adhesive tape on the underside of the lock.

4.

Press down on the handle for at least 10 seconds to seal the lock assembly into place. Do not use the lock for 72 hours after installation so the adhesive on the tape can cure.
