Tools Required:

Screwdrivers – Phillips and flat Ratchet and extension 10 MM Socket Power drill, 3/16" drill bit and 3/4" spade bit Needle nose pliers

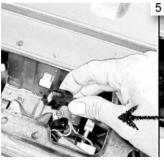

Slide Bolt

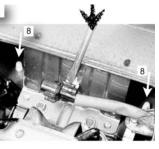

- Open the tailgate and if applicable, remove the tailgate bedliner.
- 2. Using a Philips screwdriver, remove the 12 screws holding the access panel. See Picture 2 –
- 3. Remove the access panel and set aside.
- Disconnect the light cluster connector by squeezing the connector and pulling. – See Picture 4 –
- Remove the other connector attached to the inside brace of the tailgate by using a flat head screwdriver and gently prying it out of the plastic clip. – See Picture 5 –
- Unsnap and disengage the connecting rod from the plastic retainer. – See Picture 6 –
- 7. Using a ratchet and 10 mm socket, remove <u>all</u> 4 M 6 nuts holding the plastic bezel. **See Picture 7** –
- Using a pair of needle nose pliers or similar, pinch the plastic clips to release while pushing against them to unclip. – See Items 8 in Picture 5 –
- Using one hand, push on the handle assembly, from the inside of the tailgate. Using the other hand, pull on the bezel from the outside of the tailgate until it releases completely.
- 10. Place the handle assembly on a suitable work surface being careful not to damage the exterior finish.
- 11. Remove the light cluster from the OEM handle.

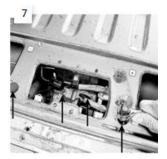

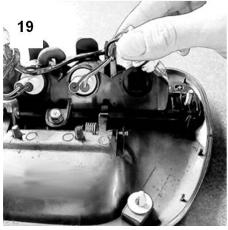

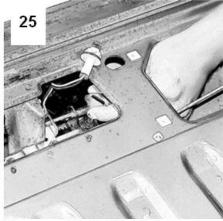

- 12. In reverse order reinstall the light cluster onto the Pop and Lock handle assembly.
- 13. Insert the Pop and Lock handle assembly back into the tailgate. First push the top of the handle assembly in the opening of the tailgate so that the plastic fingers catch the inside of the tailgate. Pass the light cluster cable into the opening and lift the connecting rod up in order to clear all of the tailgate internal metal components. Then push the bottom of the plastic handle assembly into the hole of the tailgate and push firmly until you hear audible "snaps".
- 14. Re-attach the connecting rod to the plastic retainer
- 15. Insert the Pop & Lock Bracket into the tailgate by firstly guiding it at an angle so that the large hole flap is slipped under the internal tailgate brace. Then position over the two threaded studs of the tailgate. See Picture 19 –
- 16. Thread by hand the 4 M6 nuts, but do not tighten.
- 17. Lift the tailgate into the closed or up position. Insert the lock cylinder in the 3/4" hole through the handle assembly from the outside of the tailgate. Make sure that the lock number is visible either on the right side or bottom of the lock. See Picture 21 –
- 18. Using the supplied lock nut, thread by hand over the threads of the lock cylinder, from the inside of the tailgate. Use a 7/8" socket and ratchet to tighten the nut. Please make sure not to over tighten to prevent stripping the threads of the nut.
- 19. Tighten the 4M6 nuts using the ratchet and 10 mm socket. Once again, do not over tighten.
- 20. Using the key supplied, insert in the lock cylinder and turn the key to the left, or in the unlock position and remove.
- 21. Insert the Slide Bolt through the two slots of the Bracket. **See Picture**25 –
- 22. Place the Cam inside the assembly by first slipping the Pin into the slot of the Slide Bolt. Now position the square hole of the Cam onto the square drive of the lock cylinder. See picture 26 –
- 23. Insert and tighten the 1/4" screw into the lock cylinder using a Philips screwdriver. Please hold the Cam firmly to support it during tightening of the screw preventing damage to the lock cylinder.
- 24. Using the key, test the lock system to ensure proper function.
- 25. Re-attach the light cluster connector into the plastic clip inside the tailgate.
- 26. Connect the other connector to the light cluster connector.
- 27. Replace the access panel and 12 screws.
- 28. Replace the bedliner if applicable.
