

The Cargo Safe DIFFERENCE: External aftermarket door locks act as a target for thieves by advertising where the security system can be defeated. However, the Cargo Safe is installed inside the truck or van and is hidden from view!

PROTECT YOUR TOOLS, EQUIPMENT AND VALUABLES WITH THE CARGO SAFE

ROLL-UP DOOR TRUCK

CARGO VAN

Unlocks with provided
key fob

Works with
your van
key fob

Two SECURE Options:
The Cargo Safe is designed for
a variety of applications and
door configurations:

Power Deadbolt – an
additional layer of security
that mounts inside the swing
or slide doors on cargo vans
and is compatible with the
factory door lock system
and key fob!

Power Overhead – designed
for roll-up/overhead doors
on cargo trucks, the Cargo
Safe mounts near the door
track and auto-locks when
the door is closed. To unlock,
simply press the button on
the included key fob when
approaching the vehicle.
Save time on every delivery
while improving security
and convenience!

WELCOME TO FREIGHT DEFENSE

Located in Green Bay, Wisconsin, Freight Defense’s mission is to protect medium and heavy duty fleets and owner-operators with innovative products designed to minimize theft, improve safety and keep freight moving. Our team works closely with drivers and fleets to provide custom security solutions to meet specific freight requirements. Don’t see what you’re looking for? Visit our website or contact us today!

AIR SAFE

The Air Safe™ is a one-piece durable design that locks your parking brake to help prevent theft, movement or separation of your tractor and trailer. Our lock design prevents tampering with drills or other tools, and it can be ordered to match your truck’s ignition key code if specified at time of order.

Each Air Safe™ comes with complete installation instructions, proprietary drill-proof knobs and two keys. Simply mount the Air Safe™, engage the parking brakes and turn the key. You can walk away from your rig knowing the brakes are locked.

- Unique lock cylinder turns freely when a foreign object is inserted; lock will only re-engage with your key
- Automotive-grade lock and key. Lock can be built to your truck key code
- Specially hardened steel inserts prevent tampering or drilling through knob
- Robust die-cast design holds up to abuse and wear

Model	Applications	Years	Key Codes	Part #
Freightliner	Columbia, Cascadia & Coronado	Older - 2017	FT1001 - FT3001	100294
Freightliner	Cascadia	2018 & Up	FT1001 - FT3001	100393
International	9900i (Not including ProStar)	—	Z001 - Z262	100296
Kenworth	T680 & T880	—	P0001 - P1500	100295
Kenworth	T680 & T880	—	G101 - G598	100384
Peterbilt	384, 386 & 389 (NGP 567, 579, 587)	—	P0001 - P1500	100295
Peterbilt	384, 386 & 389 (NGP 567, 579, 587)	—	G101 - G598	100384
Volvo	VNL & VNM	—	P0001 - P1500	100295

It installs easily with no need to remove it from the dash.

CARGO SAFE

THE CARGO SAFE DIFFERENCE: The Cargo Safe is an electronic locking solution installed within the door system of the vehicle. While external aftermarket door locks act as a target for thieves by advertising where the security system can be defeated, the Cargo Safe is mounted internally and hidden from view. Available for both roll-up door trucks as well as a variety of cargo van configurations, the Cargo Safe is compatible with the vehicle's factory key-fob/locking system or can be ordered to include a separate aftermarket keyless entry system. The Cargo Safe is designed as an extra layer of protection to help secure high value freight, tools, etc. Perfect for fleets, mechanical contractors and up-fitters looking to maximize vehicle security.

Roll-up Door Version

- Designed to protect high-value cargo, tools, etc.
- Door locks automatically when closed; unlock with included key fob
- Comes with 2 traditional keys and 2 remote key fobs

Cargo Van Versions

- Integrates with your vehicle’s factory power lock system or can be combined with an aftermarket keyless entry system (sold separately)
- Designs available for both slide and swing doors

Visit our website www.freightdefense.com for up-to-date application information, installation instructions, videos and pricing.

ONE-KEY T

One-Key T® is designed for use with compartment doors, tool and battery boxes. This industry standard, stainless steel latch includes an automotive-grade lock with a weather resistant shutter, providing superior performance and corrosion resistance. This handle can be coded to match your truck’s ignition key.

Security simplified. The One-Key T® handle uses your vehicle’s ignition key to secure your storage.

Applications	Key Code	Part #
Freightliner	Z001 - Z262	100173
Kenworth & Peterbilt	G101 - G598	100174
Kenworth & Peterbilt	P0001 - P1500	100175
International	Z001 - Z262	100176
—	Z Key Code (Random)	100335

SEAL SAFE

This hasp and seal protector will defend against freight contamination and tampering during transportation. User friendly and easy to install. Designed to help secure deliveries and eliminate your cost of compromised loads. Protect your most valued cargo with the Seal Safe™.

- Locks and unlocks using a 7/16" shackle diameter keyed padlock
- Designed to protect the seal from being broken
