AIR SAFE

The Air Safe is a unique air brake lock designed to protect the Class 8 market. It installs easily with no need to remove it from the dash. You can literally lock/unlock your air brake valves faster than fastening your seatbelt! Made from zinc die-cast, this one-piece durable design prevents tractor & trailer theft by keeping the tractor and trailer brake knobs locked in place when parked. Lock & Unlock your air brakes in seconds. The Air Safe features Key-2-Ignition technology allowing us to code the Air Safe to match your truck's ignition key (if specified at time of order). Random key codes also available.

AIR SAFE

WHY CHOOSE FREIGHT DEFENSE?

Freight Defense has over 50 years of experience in the heavy truck industry. Whether a Fleet, Owner Operator or an OEM, our suite of security products can protect your assets and freight from theft. Freight Defense is committed to offering you quality products that are built to last.
