

CARGO SAFE

PROTECT YOUR TOOLS, EQUIPMENT AND VALUABLES WITH THE CARGO SAFE

The Cargo Safe DIFFERENCE: External aftermarket door locks act as a target for thieves by advertising where the security system can be defeated. However, the Cargo Safe Power Deadbolt is installed inside the vehicle hidden from view.

CARGO VANS

The Cargo Safe Power Deadbolt is designed to protect...

- 1 REAR ENTRY SWING DOORS**
- 2 SIDE ENTRY SLIDE AND SWING DOORS**

Available to integrate with your factory's power door lock system or combined with an aftermarket keyless entry system (sold separately).

1997 - 2019 CHEVROLET EXPRESS

The Power Deadbolt provides an extra, hidden layer of security to the van's side and rear doors.

CARGO SAFE

INCREASE SECURITY, SPEED OF DELIVERY AND CONVENIENCE WITH THE CARGO SAFE!

The Cargo Safe is an electronic power lock that is mounted on the inside of a truck body near the roll-up door track. It is designed to automatically lock the rear roll-up door every time the door is manually closed. To unlock, simply approach the vehicle and press the button on the provided key fob.

CARGO TRUCKS

INTERNAL VIEW OF THE CARGO SAFE

REDUNDANCY

The lock can be unlocked electronically or mechanically via an internal emergency latch or exterior mounted lockset.

SECURITY

Peace of mind knowing the door is locked every time the door is closed.

VALUE

With ease of installation and a cost-effective price point, The Cargo Safe is an excellent "added option" to provide your customers with improved security, speed and convenience to their drivers.

SPEED

Saves time for drivers making multiple deliveries through the "automatic lock" and "remote unlock" technology.

CONVENIENCE

The key fob will unlock the rear roll-up door upon approaching the vehicle by simply pressing a button.
