

SEAL SAFE

PROTECT YOUR FREIGHT FROM DAMAGE OR TAMPERING WITH THE SEAL SAFE!

VSI, LLC, the largest producer of automotive grade lock-sets for the North American Heavy Truck market, presents the Seal Safe Hasp and Seal Protector.

STANDARD & UTILITY TRAILERS

- Designed for a high strength, theft resistant, 7/16" shackle diameter keyed padlock
- Tamper proof pivots for additional security
- Protects seal from damage or tampering
- Fits over existing cam lock hasp
- Seal is not damaged by shaft or lock being inserted into the hasp
- Corrosion resistant
- Easy installation - Can be permanently attached to trailer or transferred from trailer to trailer as needed
- Self-contained; fits over existing truck storage door latches

SEAL SAFE

WHAT DOES A REJECTED FREIGHT LOAD COST YOU?

Protect your freight from damage or tampering with VSI's patent pending Seal Safe. This self-contained design fits over existing truck storage door latches to eliminate the possibility of a damaged seal. The Seal Safe remains open on it's own accord to allow for seal placement and removal.

APPLICATION GUIDE

| Part # | Applications | Material |
|---------|--|-----------------|
| 390060S | Standard Model - Container, Great Dane, Stoughton, Vanguard & Wabash | Stainless Steel |
| 390062S | Utility Model - All reefer trailers | Stainless Steel |

Fits over existing truck storage door latches

The Seal Safe's hardened stainless steel and corrosion resistant surface coating shields both cable and bolt seals from hacksaw and abrasive theft attacks. The Seal Safe can be permanently attached to the trailer with high strength bonding adhesive, tamper proof sheet metal screws, rivets or industrial strength adhesive tape for additional security.
