Installation:

1. Lower the tailgate and remove the access panel with a Torx T-30 driver. If applicable, remove bedliner.
2. Release the rod ends from the plastic clips of the scissor links by prying the yellow clasps up with a screw driver.
3. Remove the two nuts using a 10 MM wrench holding the scissor bracket and handle.
4. Pry the plastic dust cover from the handle and discard it.
5. Slide the LOCK BRACKET over the driver's side stud on the handle and slide the EL over the passenger's side stud of the handle. Make sure EL bracket is flush beside the lock bracket.
6. Insert them into the tailgate from the outside.
7. Insert the scissor bracket into the tailgate from the inside. Tighten it.
8. Turn the key and check that the CAM blocks the handle from opening when locked.
9. Reinsert the rods. Position them so there is a 1/32 play before they pull the latches. Close the yellow clasps to lock them into place. Check for proper play. Reposition the rods if necessary. Reinstall access panel.

NOTE: POP&LOCK is designed to secure the passenger side latch. You may experience that the drive side latch can open due to the flex in the handle, but the tailgate will still remain locked.
