TONNEAU COVERS & TRUCK CAPS

POWER LOCK KIT

	PART
Power Lock Kit	PL9772
Power Lock Kit w/ Replacement Tear Drop Handle	PL9555

Remotely lock/unlock your truck cap and tonneau with your OEM key fob. Integrates with your vehicle's factory keyless entry system.
See website for application

Tech Note: The PL9772 will work on caps with the following requirements:
- Existing power adaptable rear handle
- Bonded rear glass door with 1-1/8" center hole and cable latch system

NOTE: Power Lock Kits are NOT compatible with metal framed rear doors.

POWER POP KIT

	PART
Power Pop Kit	PL9000

Automatically pops your tonneau cover open like the trunk of an automobile. Comes with 2 separate key fobs to remotely lock/unlock and open the tonneau.
See website for application

Tech Note: The PL9000 will work on a hardshell tonneau with a cable latching system. To convert into a cable latching system, install replacement handle (PL9585) into a center mounted 1 ⅛ in hole.

CAT-RAP™
CATALYTIC CONVERTER SECURITY

Catalytic converters are one of the most widely stolen items from an unattended vehicle. With the right tools, a catalytic converter can be stolen in less than a minute and quickly becomes a costly repair that can exceed $1500. While a standard car typically only has one catalytic converter, larger vehicles have between 2 to 4 catalytic converters, which makes them an ideal target for thieves.

INCREASED SECURITY

With the CAT-RAP™ protecting your vehicle's catalytic converters, thieves will think twice about the time, noise and effort it will take to defeat. Designed for anyone to install, the CAT-RAP™ will confuse, frustrate and help prevent against catalytic converter theft.

DURABLE MATERIALS

Designed with all stainless steel components, the CAT-RAP™ resists corrosion despite being exposed to the harshest of vehicle environments.

PART NUMBER: PL9800

UNIVERSAL DESIGN

Compatible with many vehicle platforms, the CAT-RAP™ can be easily installed within 30 minutes on a wide variety of vehicles regardless of the catalytic converter's orientation. Optimized cable length provides flexibility for wrapping techniques while installing.
